

DARAC LTD - ENVIRONMENTAL POLICY STATEMENT & EXAMPLES

Environmental policy statement

DARAC Limited is committed to fostering good environmental practises through both its staff & business practises.

Key points to achieve this are:

1. We will minimise waste by evaluating operations and ensuring they are efficient as possible
2. We will minimise pollution from fleet vehicles & source of our power requirement
3. We will actively promote recycling
4. We will meet or exceed any environmental legislation that relates to our company
5. We will encourage adoption of these principles by our suppliers
6. We will continually improve our environmental policy practises

Some examples of these practises are outlined below :

1. Don't print documents that can be saved/archived on computer so that paper use is minimised
2. Keep unnecessary journeys to a minimum (e.g. walk rather than drive to local shops)
3. Drive with steady not sudden acceleration & braking
4. Use paper sourced from sustainable forests
5. Put paper/cardboard and steel in the recycling bins – NOT the main dustbin
